

Notes Collection Checklist

✓ 4 more properties

Hi! To make sure the note data we collect is perfect, let's use this simple checklist. This is for text-based notes you write for yourself or share with others. Can you check every box? Let's go!

✓ 1. General Rules for All Notes (Common)

☐ Is it real?:

- It must be a real note written by you, not something made up by an AI or copied from a generic source.

☐ Is it recent?:

- It should be from the last 5 years (2021~now).

☐ Is it from your assigned country?:

- The data must be generated in the country you are assigned to.

☐ Is it the right file?:

- It must be a `.txt` file. If you can't export it natively from your app, copying the text into a `.txt` file is perfectly fine!

☐ Is it readable?:

- Make sure the text is clear, even if there are typos or grammar mistakes (those are actually okay, as long as it's real!).

☐ No spam!:

- Avoid simple product ads or junk mail content.

☐ **Anti-AI Evidence (Required)!:**

- **No Evidence = Rejection.** You MUST submit a separate screenshot as proof that the note is real and not AI-generated.
- **Physical Notes:** Submit a photo of the actual handwritten paper.
- **Digital Notes:** Submit a screenshot from the app that clearly shows the creation date and modification history.

☐ **Metadata check!:**

- You must record the following info in the metadata sheet: **age, gender, country, occupation, primary, secondary, topics of interest, application used, OS, device info, YYYY.MM.DD.**
- **Age Scope:** Use these ranges: ["18-25", "26-35", "36-45", "46-60", "60+", "prefer_not_to_say"]
- **Date (Crucial):** YYYY.MM.DD must be the **actual date the note was originally written or modified**, not the submission date.

☐ **Evidence check!:**

- Notes data must always be accompanied by a corresponding screenshot as proof.
- **Please note that verifying the date through TXT file properties is not acceptable; the screenshot itself must clearly show the date the note was written.**

☐ **Geographic Data Restrictions!**

- If the assigned language is **en_US**, the data **must not include** any information collected from the states of **Texas, Illinois, or Washington**. Also, participants must not reside in these states.

2. Is it a Contact Note?

☐ **Is there a name?:**

- We must know whose contact it is. A person's name (e.g., "John Smith" or "Manager Kim") must be included.

☐ **How to contact them?:**

- At least a phone number or an email address should be in the note.

☐ **Is it a direct contact?:**

- It must be info for a specific person, not just a general business number (like a school's front office or a large hospital's main line).
- **Small Business:** A business contact is okay ONLY if a specific individual's name is attached. (FAIL if only business name/position like "General Manager" is shown).

☐ **Is it a practical list?:**

- Only submit useful lists (e.g., principal, teacher, nurse) that a user would actually want to save.
-

 3. Is it for an Event?

☐ **What is the plan?:**

- There must be a title or a clear description (e.g., "Dinner with Mom" or "Project Sync").

☐ **When is it?:**

- A date is required. (Times are even better!)

☐ **Where is it?:**

- A location must be shown (e.g., "Starbucks" or "Room 3B").
 - **Implied/Unique Location:** Routine appointments or globally unique locations (e.g., "Eiffel Tower") are acceptable.
-

 4. Is it for People & Relationships? (Special Category)

☐ **Clear Connection:** There must be a clear connection between you (the participant) and the person mentioned in the note.

☐ **Implicit Relationships:** Relationships that are clearly implied by context are acceptable (e.g., "pick up the kids at home" implies a co-parenting/family relationship).

☐ **Group/Incomplete Names:** If at least one relationship is clear (e.g., "Aunt Carol"), the note is acceptable even if other names (e.g., "Ryan") are less clear.

☐ **Work & Confidentiality:**

- **FAIL Rule:** If the note reveals **internal company affairs, secrets, or sensitive corporate business**, it is a **FAIL**.
 - **Confidentiality:** Avoid data showing specific growth plans, revenue targets, or priority account lists.
 - **Coworkers:** References to working together are acceptable only if they do not violate the confidentiality rule above.
-

 5. Is it about a Topic of Interest?

☐ **Is it a deep capture?**

- Avoid very simple notes like "Buy milk" or "Go to gym."
- **Prefer Recorded Info:** We prefer notes that **capture information delivered by others** (e.g., lecture notes, technical meeting minutes, expert instructions). (FAIL if only simple personal thoughts/diaries/reviews).

☐ **No Recipes/Tips:**

- **Recipes** are NOT considered deep interest. (FAIL)
- **General Tips** (e.g., natural disaster safety tips, survival tips) are NOT considered deep interest. (FAIL)

☐ **Focus on the work? (Music/Movie/TV)** Focus on the music/movie/TV show itself (composition, technical analysis).

☐ **NO Gossip/Athletes:**

- Do not include content about individual actors, artists, celebrity gossip, or **individual athletes/players**. Focus only on the work, production, or technical aspects of the sport itself.

☐ **Quantity Limit:**

- You can submit a maximum of **2~3 data assets for a single detailed 'interest/topic'** per contributor to ensure diversity.

☐ **🚫 Health & Fitness Warning!:**

- While workout plans or food logs are okay, **NEVER submit medical consultations, insurance info, or sensitive disease records!**
-

Realistic "Deep Interest" Examples (Recorded Info)

[!IMPORTANT] These examples are for reference only. Do NOT copy or recreate these exact topics!

※ **WARNING: Submissions that copy or closely mimic these examples will be strictly REJECTED due to lack of originality and failure to follow guidelines.**

1. Sports

- Detailed instructions or session notes dictated by a professional coach.
- **Note: NO athlete gossip or personal player stats.**

2. Movies/TV-Shows

- Detailed notes summarizing a professional screenwriting workshop or a director's talk.
- **Note: Avoid personal fan theories; prioritize info recorded from expert/formal sources.**

3. Music

- Technical session notes from a sound engineering masterclass or a professional mixing workshop.

4. Food

- Technical brewing parameters or fermentation steps provided by a master baker or brewmaster.
- **Note: NO Recipes.**

5. Arts & Crafts (Hobbies)

- Notes from a workshop on advanced art conservation or specialized pottery techniques.

6. Automotive

- Professional maintenance specifications or technical service instructions from a car manufacturer manual.

7. Technology

- Study notes summarizing a textbook chapter on how specific AI "Attention" architectures work.

8. Travel & Vacation

- **Note:** Transit tickets are for the **Event** category. Use this for expert-level logistics notes (e.g., high-altitude trekking requirements).

9. Weather

- Expert summary of meteorological patterns (e.g., El Niño) or atmospheric physics.
- **Note: NO Safety Tips or other Tips.**

10. Health & Fitness (NON-MEDICAL ONLY!)

- Professional instructions or coaching plans from a certified fitness trainer (e.g., biomechanics breakdown).

11. Finance & Stocks

- Detailed notes summarizing a market analysis report or expert investment talk.

12. Government & Politics

- Expert summary or lecture notes on a new local zoning law or legislative draft.

13. School & College Life

- Notes capturing a professor's analysis or a formal lecture on graduate ROI math.

14. Gaming

- Recorded strategy instructions or level navigation splits dictated by a professional speedrunner.

15. Outdoor Adventure

- Expert-led training notes on survival techniques or high-altitude navigation logistics.

16. Academic & Professional

- Detailed notes from a Ph.D. seminar or a professional engineering symposium.

17. Traditions & Celebrations

- Study notes on the historical symbolism and ritual steps of a regional festival.

18. Work Life

- Technical workshop minutes or formal corporate training notes on workflow optimization.

Checked everything? If you can answer "Yes" to all, you are ready to submit! 👍
